

Session ID	Additional Comments	What subjects would you like to see addressed in future CSCs?
S09	Can not read powerpoint, too small. Shelly was excellent!	
S09	Maybe a clear more breakdown of types of analysis. Maybe more advice for project teams and counsel during course of construction job	
S09	Great presentation that would warrant a longer period of time	
S09	The panel could have presented and explained the material in a more clear manner. Panel made several inside references or jokes that you would not understand unless you were an expert in delay analysis	
S09	Really good topic and presentation. Very knowledgeable panel. Made for an interesting presentation	
S09	Excellent course. Shows that the presentations at CSC are improving! Well done	
S09	Focuses on Daubert challenge cases too long. Missed purpose of session, or cut it short	

Session ID	Additional Comments	What subjects would you like to see addressed in future CSCs?
S09	Good session even for practitioners that do this for a living	
S09	Seating area was a little tight, made it hard for late comers to find a seat without disrupting the presentation because attendees had to stand and move aside to let the late comers into a middle seat. PPT slides, some of them, had too much info on them, making them hard to read. Shelley Ewald was great!
