

Comments for Session: E04

Question: Additional Comments

Additional Comments:

Many programs should have coffee in each room.

Additional Comments: Too focused on one industry (OGC) & international projects. Too niche focused on mega OGC international projects. Too "clubby" as the panelists work together on the projects discussed. No alternative or additional perspective.

Additional Comments:

Was hoping for more practical strategic ideas w/ specific examples

Additional Comments:

Some good points. Too much bluff and posturing. They should have kept it basic, identifying disputes early and how to measure.

Additional Comments:

Not expecting only international mega projects. Anticipated some domestic.
