

Session ID	Additional Comments	What subjects would you like to see addressed in future CSCs?
S18	More legal discussions please	
S18	Suggest talking about IT vendors, doc control, construction IT services too. Back door and security protocols need to be met for these folks, especially under government contracts	
S18	Great discussion, very informative	
S18	Spoke way too fast and no mic! Hard to follow. Material too rusted. On some slides too small for us to read. All presented too fast. Other two speakers had louder voices but mic still would've been better
