Chad Theriot, Partner, Jones Walker LLP

Why AI Matters in Construction

- Introduction
- AI's Impact on the life cycle of a Construction project
 - ✓ Bidding work
 - ✓ Performing the work
 - ✓ Changes, claims and disputes
- Best practices

Why AI Matters in Construction

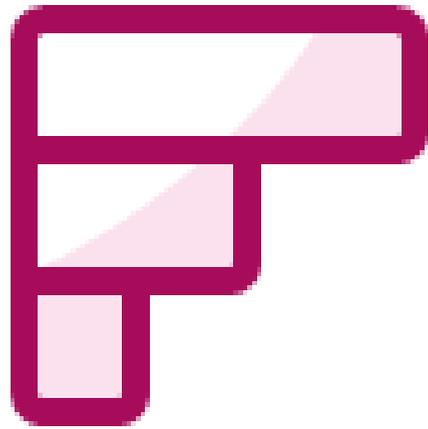

- Paradigm shift
- Benefits
- Risks
- Speed of technological advancement

Why AI Matters in Construction – Audience Survey

Who is in the audience?

On a scale of 1-5 (with 5 being the highest), how often are you using AI tools (ChatGPT, Grok, etc.) in your construction practice?

In your organization or your client's organization, what percentage of people do you think are using AI to help them perform daily construction jobs?

Follow-up question: For those organizations, are policies and safeguards in place to address that use of AI?

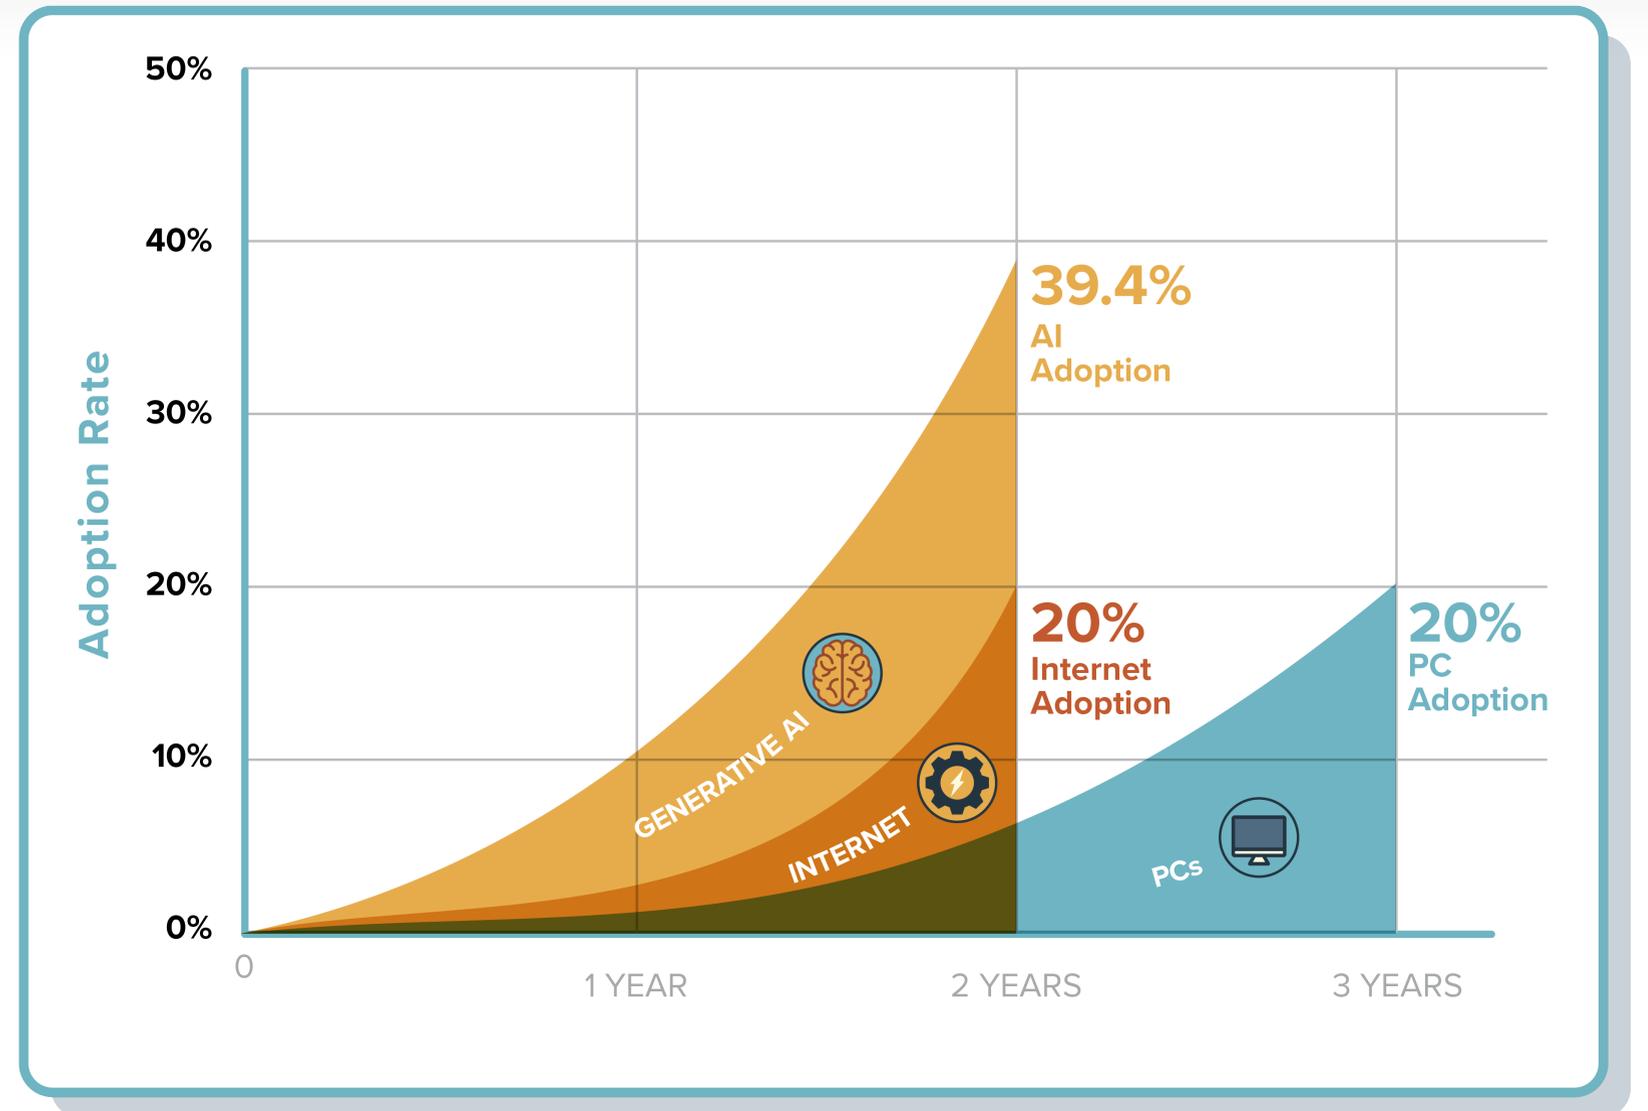

Key Terms in AI

- Digital twin?
- Hallucinations?
- Discriminative AI vs. Generative AI
- Analytical AI vs. Operational AI

Adoption of Generative AI

“Just two years after the public release of ChatGPT, **39.4%** of Americans aged 18-64 reported using generative AI, with 28% using it at work. To put that in perspective, it took two years for the internet to hit a **20%** adoption rate and three years for PCs.”

Source: Michael Nunez, “[Generative AI adoption surpasses early PC and internet usage, study finds](#),” VentureBeat, September 24, 2024

Bidding the Work

- AI tools for contract bid review
- Human oversight
- Legal and commercial risks
- Best practices
- Data privacy and cybersecurity

Chasing and Bidding the Work – Audience Survey

Have you used AI to review contract terms?

Have you used (or does your client use) AI in bidding or design phases? Yes/No.

If yes, in one word or two, what was the biggest win or headache?

Do you ever see a time when you will be comfortable enough to have AI perform a contract review with minimal oversight?

Does your company use AI to do do takeoffs?

Does your company use AI to review designs for scoping and pricing the work?

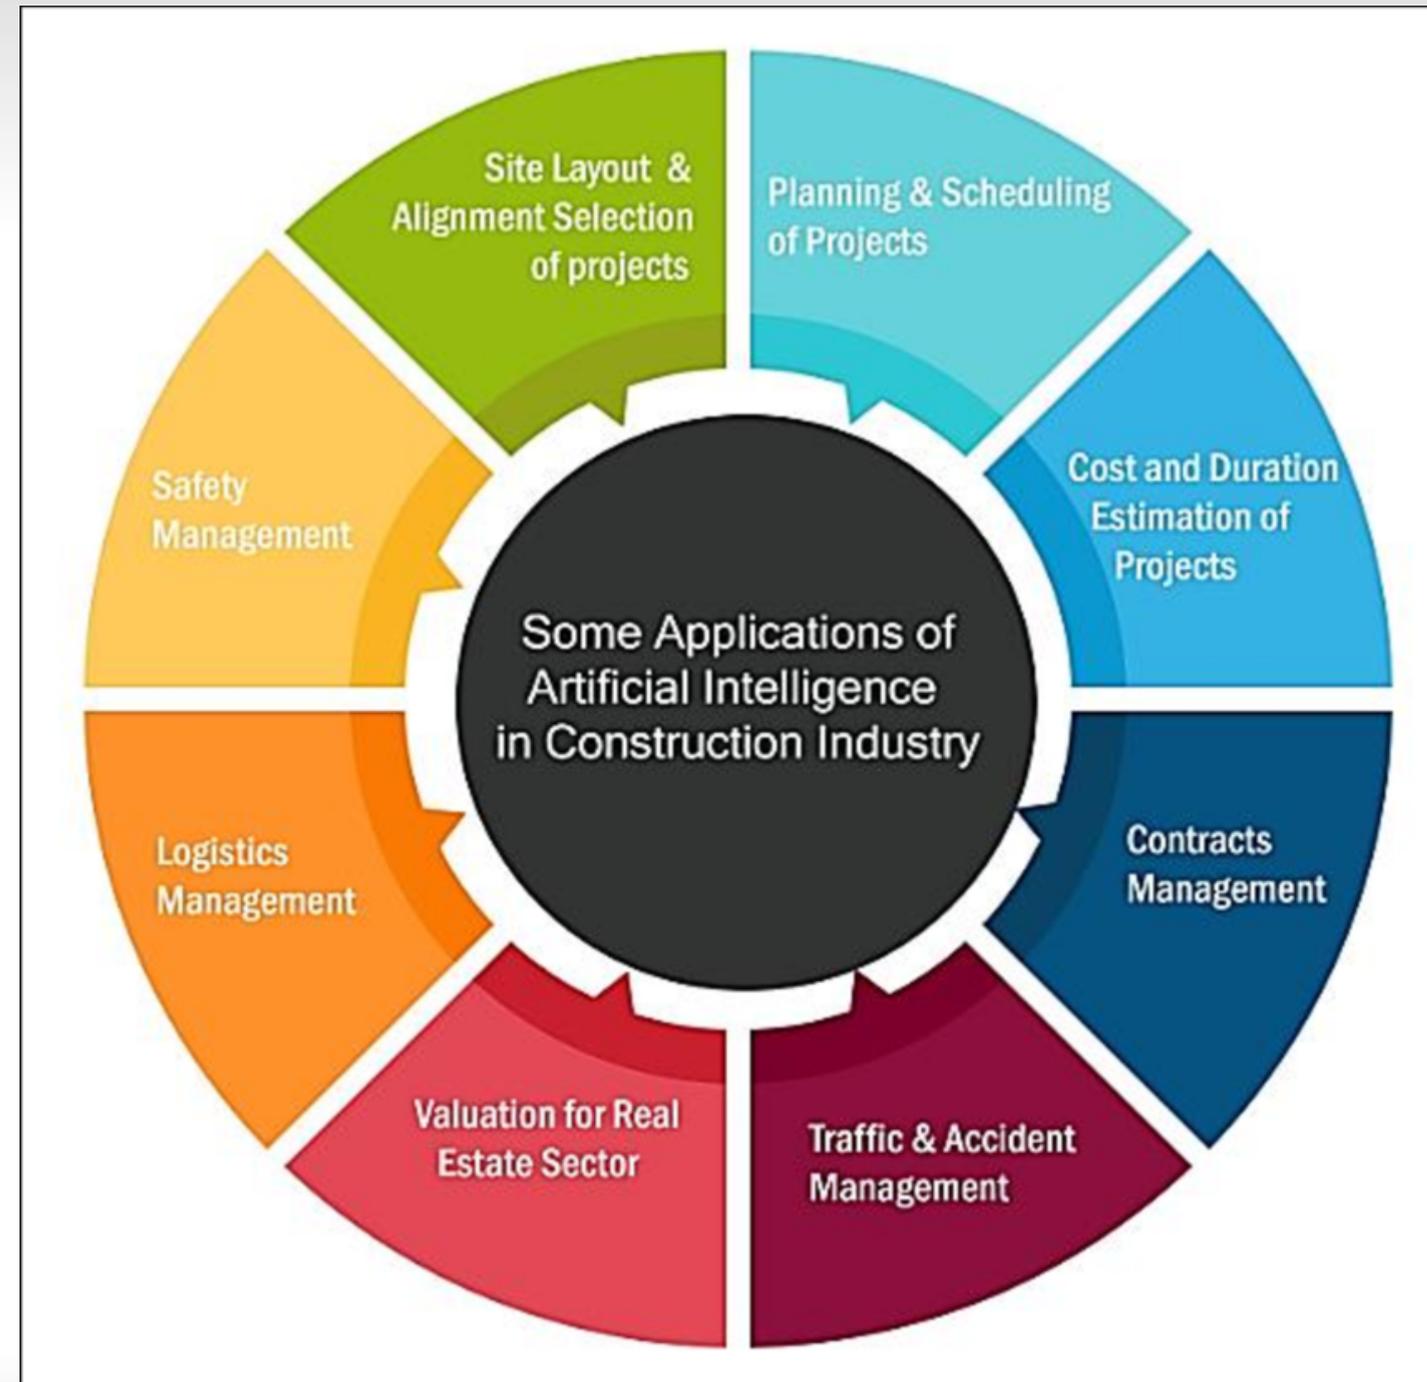

Bidding the Work

- Best practices
 - In-house
 - Outside counsel
 - ESI collection
- Legal and commercial risks

Performing the Work

- Predictive scheduling
- AI as a “health check”
- KPI dashboard
- Drafting notice and other contract documents

Source: Aryansh Gupta, “Challenges in Integrating Artificial Intelligence with Building Information Modeling in Construction Management: A Comprehensive Analysis,” *International Journal of Building Information Modeling Applications in Construction*, May 15, 2025

Performing the Work – Audience Survey

How often does your company (or clients) use AI for real-time performance tracking, like drone scans or sensor data for schedule updates?

If AI could auto-generate contract notices for delays (e.g., via integrated ERP systems), would you mandate its use to avoid waiver risks in disputes?

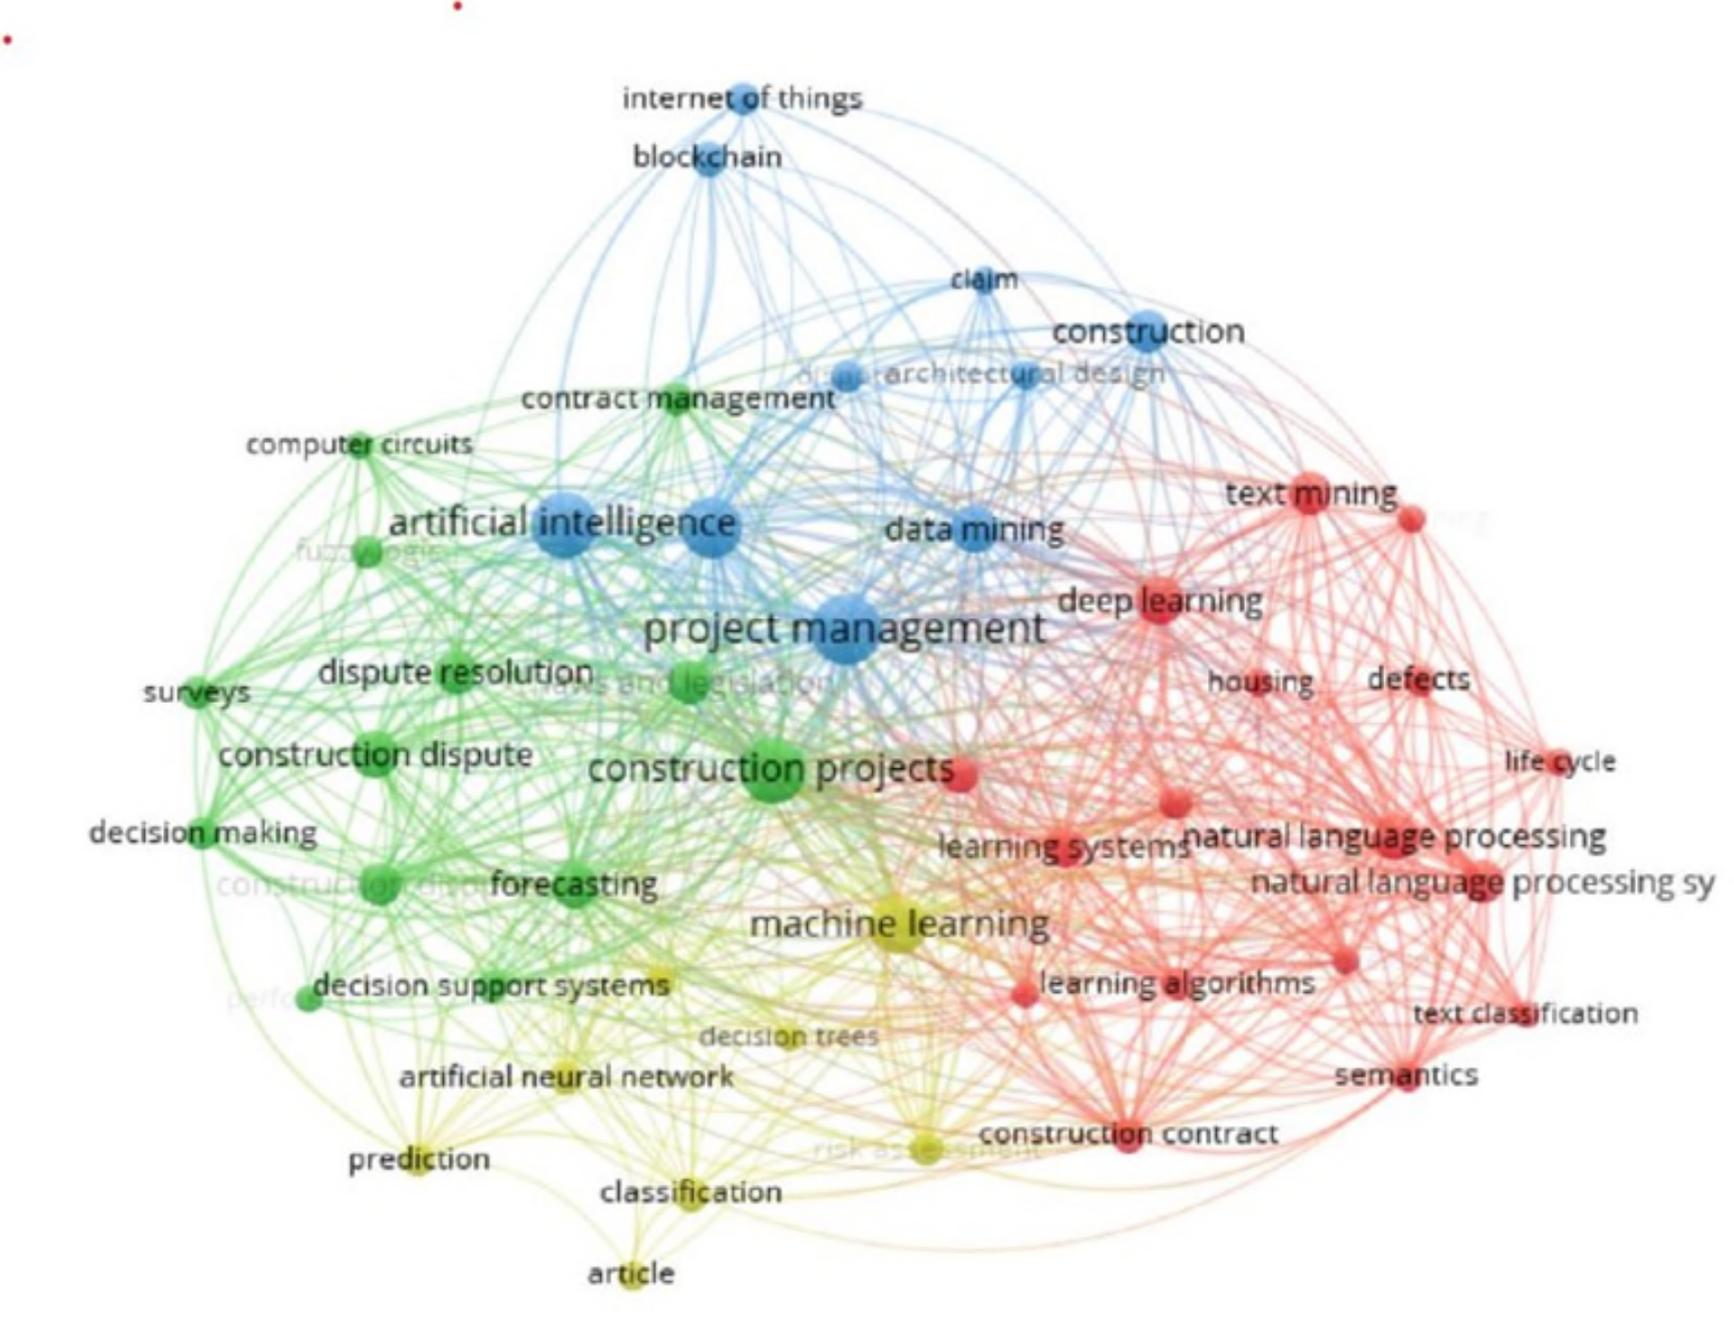

Performing the Work

- Best practices
 - In-house
 - Outside counsel
 - ESI collection
- Legal and commercial risks

Handling Changes, Claims, Disputes

- Notices of claims
- Change order processing
- Document review
- Dispute Resolution

Keywords for Dispute Management in Construction Sector

Source: Prashna Ghimire, Kyungki Kim, and Manoj Acharya, "Opportunities and Challenges of Generative AI in Construction Industry: Focusing on Adoption of Text-Based Models," *Buildings*, January 14, 2024

Handling Changes, Claims, Disputes – Audience Survey

Have you seen AI used for creating a change order or claim?

Are you using AI for electronically stored information (ESI) in construction claims or disputes?

Do you have language in your engagement letters with counsel/clients regarding the use of AI?

For all the **arbitrators** in the room, how familiar are you with the use of AI?

For all the **litigators** in the room, how familiar are you with the use of AI?

Do you envision a future where AI is used to resolve construction disputes?

AAA's New "AI Arbitrator"

- Construction Disputes
- 35% cost savings and 20%+ time reductions
- leveraging AAA's 99 years of expertise
- Ethical safeguards

Dispute Revolution

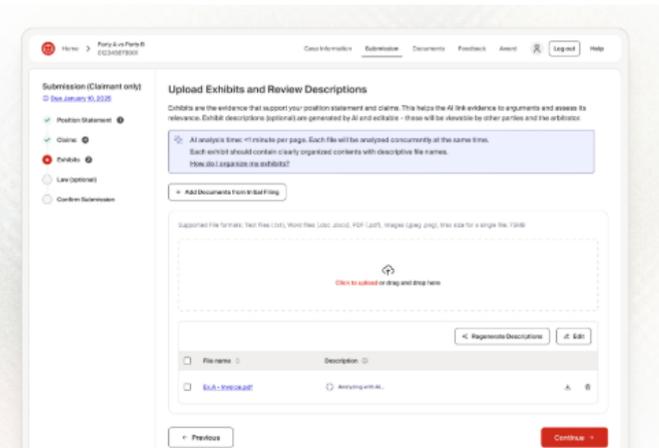

What's now and what's next in legal AI

Introducing the AI Arbitrator

AI Efficiency. Human Judgment. Faster Resolution.

The AI arbitrator from the American Arbitration Association® combines the speed of artificial intelligence (AI) with trusted human oversight to deliver faster, more cost-effective dispute resolution.

Through a guided, prompt-driven interface, parties upload case materials and confirm that the AI accurately captures their claims and evidence. The AI then applies legal reasoning to draft a recommended award, which the human arbitrator reviews, refines, and issues.

AAA's New "AI Arbitrator"

How the AI Arbitrator Works:

- Parties submit their claims and evidence.
- Parties validate their submissions are accurately summarized by the AI arbitrator.
- The AI arbitrator parses claims, analyzes evidence, applies law, and drafts a proposed award.
- An AAA-trained human arbitrator reviews, revises as needed, finalizes, and issues the award.

AAA's New "AI Arbitrator"

- Overseen by human arbitrator
- Trained based on 99 years of similar, smaller (not complex) Awards
- Parties have the opportunity to review and confirm that the AI correctly summarized their claims and submissions before their information is submitted to the human arbitrator
- Complex cases? "Not yet." Currently "document-only" construction disputes
- Award remains the human arbitrator's award, not the AI's.

Artificial Intelligence – Audience Survey

In-house counsel, would you trust AI to resolve smaller disputes?

Do you use AI to synthesize evidence and create deposition outlines?

In less than three words, what do you see as the primary risk when advising on AI use in change order or claims processing with project team?

The Road Ahead

- Risk Management
- Best Practices
- Privilege risks
- Ethical safeguards

The Road Ahead – Audience Survey

What's the most impactful AI takeaway you're leaving with today for your construction law practice?

Do you believe AI will fundamentally transform construction disputes in the next decade?

What's the biggest AI-related challenge you'll tackle first after this conference?
